Introduction

Uniformity is an e-commerce-style marketplace focused on uniforms. The system allows users to register, log in, browse available uniforms, add products to cart, place orders, and manage their own listings.

Introduction

Our application is built as a full-stack web system. The frontend handles the user interface and interaction, while the backend manages authentication, database operations, order processing, and API requests.

Technology Stack

- **HTML5** for the structure of the web pages
- **CSS3** for styling and responsive layouts
- **Bootstrap 5** for UI components and layout support
- **JavaScript** for client-side interactivity
- **Node.js** as the backend runtime

Technology Stack

- Express.js for creating REST API routes
- MongoDB as the database
- Mongoose for database modeling
- JWT for secure authentication
- bcryptjs for password hashing
- Cloudinary API for image upload and storage
- PWA features using a web manifest and service worker
- Render for deployment

System Features Overview

Buyers can create an account and log in securely. After logging in, they can browse available uniforms posted by sellers. The browse page includes search, category filters, size filters, sorting, and pagination so users can find items more efficiently.

System Features Overview

The seller side allows users to sell uniforms they no longer use. Sellers can add new listings by entering product details such as product name, price, size, category, stock, description, and image. They can also edit or delete their existing listings when needed.

The screenshot shows a web application interface for managing product listings. A modal titled "Edit Listing" is open, allowing a user to update an existing listing. The form includes the following fields:

- Uniform Name:** A text input field containing "UST Uniform".
- Category:** A dropdown menu with "School Uniform" selected.
- Size:** A dropdown menu with "L" selected.
- Qty:** A text input field containing "44".
- Price (PHP):** A text input field containing "500".
- Description:** A text area containing the following text:
FS: Old design of uniforms. Basin naay gusto mag avail. 😊
Use but not abused. 😊
My clothes are well taken cared of. walay damage and issues.
Size: Large Type A and B. (Male)

At the bottom right of the modal are two buttons: "Cancel" and "Save Changes".

In the background, a table of listings is visible. The first row shows:

Product Name	Image	Price	Stock	Status
UST Uniform	Paul Red	1	PHP 500.00	Delivered

System Features Overview

When a buyer places an order for a seller’s item, the seller can view the incoming order and update its status. The order flow helps sellers manage fulfillment properly, from pending to fulfilled, and then delivered after the buyer confirms receipt.

● ORDERS

Incoming Orders

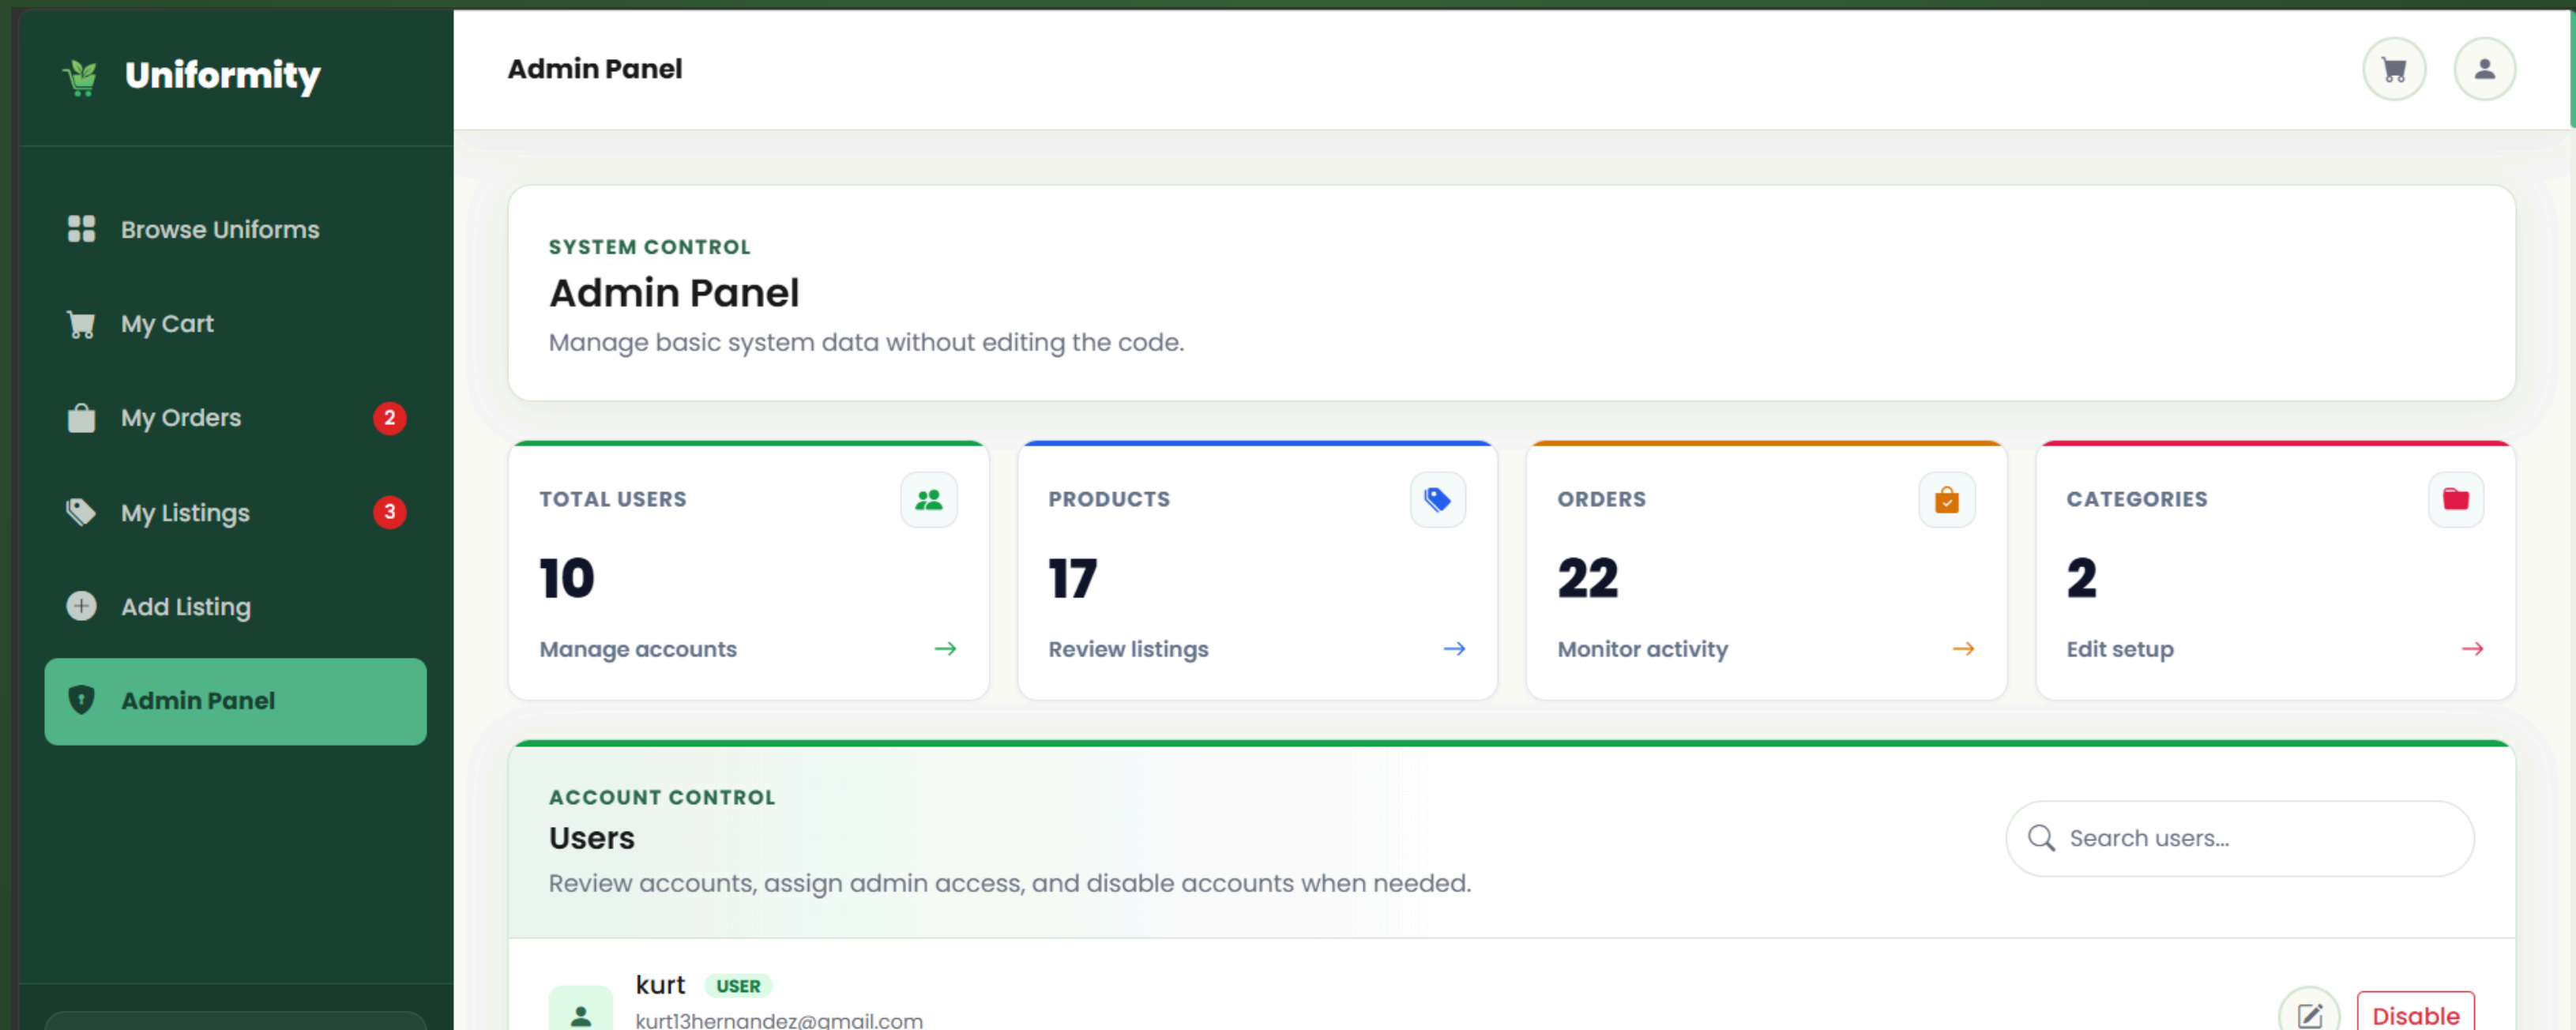

Track buyer requests and update item fulfillment.

ITEM	BUYER	QTY	TOTAL	STATUS	ACTIONS
 UST Uniform #752EEF73 - May 10, 2026	Paul Red	1	PHP 500.00	Cancelled	View Order Details
 UST Uniform #1BC2AAEA - May 10, 2026	Paul Red	1	PHP 500.00	Delivered	View Order Details

System Features Overview

The admin side is designed to help manage the entire system.

Administrators can view dashboard statistics and access management sections for users, products, categories, and orders.

System Features Overview

Admins can manage user accounts, review listed products, organize product categories, and monitor order activity. This makes the platform easier to maintain because important data can be controlled through the admin panel instead of directly editing the database.

ACCOUNT CONTROL

Users

Review accounts, assign admin access, and disable accounts when needed.

Live Demonstration

Challenges Encountered

Future Improvements

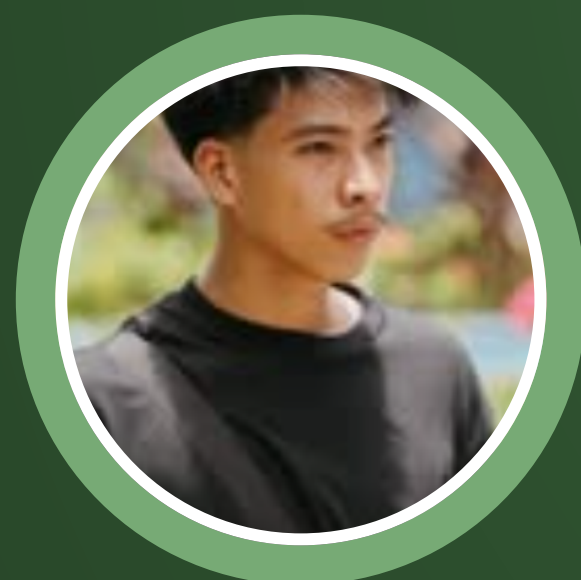

- Adding an online payment system so buyers can pay directly through the platform. This would make the transaction process more complete and convenient.
- Another possible improvement is a buyer–seller chat feature. This would allow users to communicate safely inside the application instead of relying on external messaging.
- OTP authentication for email registration
- A rating and review system.
